---

Hi Kimmie! This is one piece of business for the work session. Call it "Request for help with signage from Cape Perpetua Area Collaborative. This forwarded email and the photos are supporting documents for the packet. I am looking for one other item of business and will send it as soon as I locate the attachment for it.

Hi Dawn,

My name is Tara DuBois and I am the Communications Coordinator for the Cape Perpetua Collaborative. Paul Engelmeyer and I are in the process of putting together a grant application for interpretive signs along the 804 trail. Here are the locations and sign examples of what we are considering for topic/content. The items highlighted in red I believe fall in the city's purview.

- Yachats State Park – Viewing Platform (chat with state park re: install type)
  - Marine Reserves & Protected Areas ([template we could use](#), would need to adapt to show boundaries and discuss different between MR/MPA)
  - Whale Trail Sign [Whale Trail sign?](#)
- **7th/6th Street** (coupled with trail sign at this location – Above ground)
  - Marbled Murrelet / Land-Sea Connection ([template we could reuse/adapt](#))
- **Marine Dr**
  - **International destination/migration patterns** ([template we could reuse](#))
- Overleaf Lodge/North 804
  - Upwelling/foundations of food web ([template we could reuse](#))
  - Gray whale sign [Whale Trail sign?](#)

I spoke with Bob Langley and he recommended I reach out to you (Parks & Commons Commission) to start the process. Can you share with me what steps we need to take to look at having signs installed at the 2 locations above and the approval process? What is the timeline for approval?

Any information you can share would be wonderful. Thank you and I look forward to hearing from you.

Tara DuBois

Communications Coordinator

Cape Perpetua Area Collaborative
