

# City Council Action Item Cover Sheet

DATE: 9/1/2023

## **Agenda Item:**

Fencing and gates to protect wastewater treatment plant area past the yard debris dumpster

---

## **Question Before Council:**

Can we authorize the addition of a capital improvement project for the current fiscal year?

---

## **Person/Group Initiating Request:**

Neal Morphis, City Clerk, City of Yachats

---

## **Item Summary/Background:**

The wastewater treatment plant has a yard debris dumpster that is accessible to the public behind a gate. I have reached out to five different fencing and gates companies, and have received two estimates. Tom Lauritzen of the Finance Committee has advised that we should use the line in the budget for Park Masterplan Project Implementations.

---

## **Issues/Concerns:**

When the gate for the yard debris dumpster is open, someone potentially has access to the rest of the wastewater treatment plant. It is a security concern as there are sensitive controls that should not be accessed by the general public. Installation of additional fencing and gates would limit access to just the yard debris dumpster.
