

CIP# - Water Master Plan

Status: Engineering/Design Phase

Project Category: Water

Project Estimated Cost: \$90,000

Project Description

The Water Master Plan is designed to address the needs of the Water system over the next 20 years. The last one was updated in 2001. It is designed to help in establishing a capital improvement and capital maintenance plan for the water system. The report provides descriptions of the recommended improvements and an opinion of probable project cost for each item
